ACKNOWLEDGEMENTS

The Scott County 2030 Comprehensive Plan Update involved an ongoing exchange of information, analysis, and response between public officials, citizens, County staff, technical work teams, and consultants. In addition to the cooperation all eleven townships and seven cities, we received input and direction from thousands of county residents, business owners, and land owners. We would like to thank everyone involved in the 2030 planning process for all of their valuable input and dedication to creating a truly comprehensive plan for the people of Scott County.
