Highways 169/41/78 Intersection Improvements

November 2015

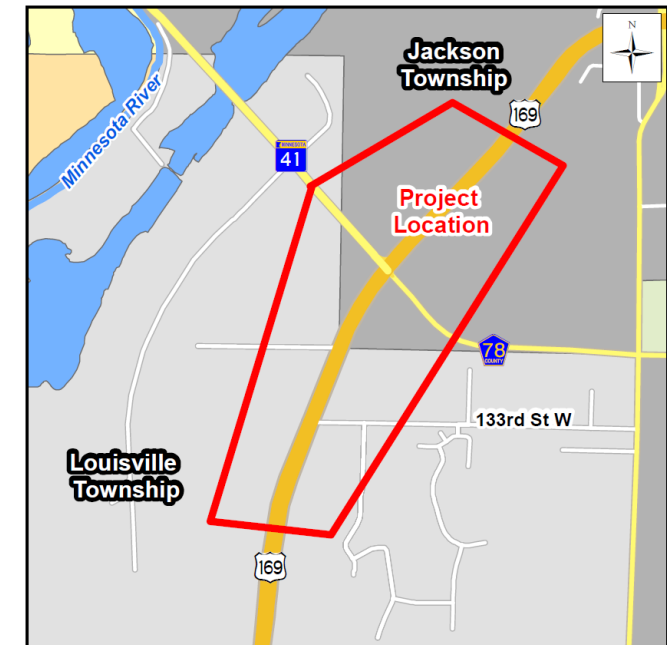

OPEN HOUSE INVITATION

Tuesday, November 17, 2015

5:00—7:00 PM

Jackson Township Hall
1091 130th Street W
Shakopee, MN 55379

What's Inside?

- Project Background/Purpose
- Open House Information
- Project Schedule

Background/Information

Scott County in partnership with MnDOT is starting the concept development for improvements at the US Highway 169, Trunk Highway (TH) 41, and County Highway (CH) 78 intersection. This intersection has long been recognized as being congested with lengthy traffic back-ups, a high number of crashes, and delays associated with the traffic signal. This intersection currently operates at capacity, and conditions are expected to worsen due to projected increases in traffic and development.

For a number of years local, regional, and state agencies have been exploring opportunities to address problems at this intersection and extend the frontage road system along US 169. This US 169/TH 41/ CH 78 intersection project is separate from the recent study for a new TH 41 regional river crossing, which is likely decades away from being built.

Based on past priorities, Scott County applied for and received federal funds to construct improvements in this area. The Scott County Board of Commissioners also identified an interchange and supporting frontage road improvements as a top priority for the recently adopted Scott County transportation sales tax program. These new funding opportunities have led to the need to define what improvements are needed in the area of the US 169/TH 41/CH 78 intersection.

Project Purpose/Goals

The purpose of the US 169/TH 41/CH 78 project is to identify and develop intersection improvements that address safety, mobility, freight, accessibility, and connectivity needs while minimizing impacts to residents, businesses, and natural resources. A number of intersection designs, including interchanges, will be developed and explored. Goals of the project include providing the following:

- An inclusive public participation process
- Safety and mobility serving the area for the long-term
- A connected frontage road system to serve local residences and businesses
- Improvements that are consistent with local, regional, and state plans and standards

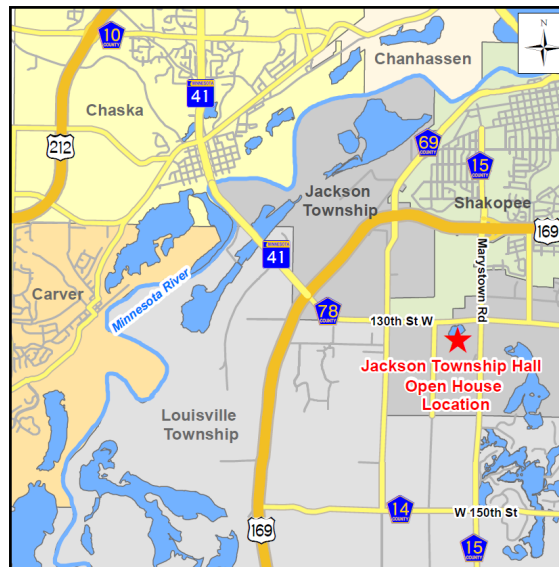

Open House #1: Project Kick-Off

At the open house, you will have the opportunity to:

1. Review the project process and schedule;
2. Identify existing concerns and issues at the intersection and along the corridor; and
3. Assist in developing potential solutions to existing and future problems in the project area.

This is an informal open house meeting. No presentation will be given. Your input will ensure the project team develops a comprehensive understanding of the issues along the corridor from those who use this intersection every day. County staff, MnDOT staff, and township officials will be available to discuss issues and listen to your concerns. Maps and more information will be available for review.

US 169/TH 41/CH 78 Open House
Tuesday, November 17, 2015
5:00—7:00 PM
Jackson Township Hall
 1091 130th Street W
 Shakopee, MN 55379

Project Schedule

The project is divided into two phases. The overall project will develop plans for the selected intersection improvements to begin construction in 2018.

Phase 1 includes developing concepts, selecting a preferred alternative, completing the federally-required environmental documentation, and developing preliminary construction plans. This is anticipated to be completed by January 2017.

Phase 2 includes right-of-way acquisition, obtaining final environmental clearances, and finalizing construction plans. Phase 2 is anticipated to be completed by January 2018.

The schedule below highlights activities to be completed as part of Phase 1.
