Re: County Highway 53 Pavement Project

Dear Property Owner:

Scott County has been performing a pavement replacement project on CH 53 (German Road) for its entire length from TH 19 to TH 169 this summer as part of our annual pavement overlay program. We are partially complete with CH 53 and this letter serves to inform you of pending remaining activities.

As you are aware, we began pavement activities in early July. We encountered poor soil and groundwater conditions that resulted in some poor base pavement as many have observed. Upon completion of the initial base paving, the contractor moved off the project to allow the bituminous to compact prior to our return to complete this project. You may have also noticed paint marks on the roadway surface identifying repair locations.

Over the next several weeks, the contractor will be back on CH 53 to cut out and re-pave poor pavement areas. The contractor will return to construct the final leveling pavement course likely in late September or early October. Finally, we will finish with shouldering and roadside slope grading. In the spring of 2020, we will be back out to sealcoat the roadway.

Thank you for your patience in this effort. If you have any questions, please contact Jake Balk, Construction Manager, at 952-496-8436, or feel free to give me a call.

Respectfully,

Anthony J. Winiecki, P.E.
County Engineer
