Definitions:

Accessible Vehicle: An accessible vehicle is defined as a vehicle that has a lift or ramp and appropriate interior size to safely allow access for people who have motorized wheelchairs and scooters.

Deviated Route: Transit service that operates along a fixed route, but may deviated from the route to pick up or drop off passengers who have requested the deviation.

Ridematch/Vanpool: MetroTransit's Regional Ridematching System matches commuters traveling similar routes and times to form carpools and vanpools. The commuters then share

Additional Notes:

*SmartLink offers a Travel Training program to assist individuals in learning about their transportation options and providing training to learn the options that will work for them. For more information, please contact: transit@co.scott.mn.us or (952) 496-8341 option 2.
