

SUID & AHT off Year Video Training Verification

Family Child Care

Minnesota Statutes, section 245A.50, requires sudden unexpected infant death (SUID) training for all license holders, staff persons, caregivers and helpers who assist in the care of infants. Abusive head trauma (AHT) training is required for all license holders, staff persons, caregivers, and helpers who care for infants and children under school age. On the off years when the license holder is not receiving SUID and AHT training face-to-face, in a classroom, or online, the license holder, staff person, caregiver, or helper must receive SUID and AHT training through a video of no more than one hour in length.

While no specific method of verification is required, you may print this page for documentation that you have watched each of the approved videos to fulfill your training requirement for the “off year.”

_____ I verify that I have watched the series of approved videos to meet the SUID training component.

_____ I verify that I have watched the series of approved videos to meet the AHT training component.
