

Native Septic Mix (\$65)

Description:

Hide your unsightly septic system with beautiful natives that bloom all season long! Plants in this mix were chosen specifically for septic systems as they can grow on poor soil and their root systems are not long enough to interfere with your drain field. Natives do not require long-term regular mowing which makes this a great, low maintenance option.

Species:

12 Species of native flowers, including Butterfly Milkweed, Sky-Blue Aster, Partridge Pea, White Prairie Clover, Purple Prairie Clover, Wild Lupine, Slender Beardtongue, Long-Headed Coneflower, Black Eyed Susan, Old Field Goldenrod, Stiff Goldenrod, and Hoary Vervain. **6 Species of native grasses**, including Side-Oats Grama, Blue Grama, Bicknell's Sedge, Junegrass, Little Bluestem, and Prairie Dropseed.

Quantity:

Covers up to 2,500 square feet

Butterfly Milkweed

Sky Blue Aster
