

Project Background

Scott County, in partnership with Credit River Township, has developed a project to improve safety and operations on CH 8 (Lucerne Boulevard) between the intersection of CH 91 (Vernon Avenue) and the eastern county border. In addition, the county has been cooperating with Dakota County and the City of Lakeville to extend the trail element of the project across the border into the City of Lakeville where it will connect into an existing trail system.

Over the course of the past year and a half various concepts and alternatives were developed and evaluated to address the existing safety and mobility problems on the corridor and to provide a separated trail along the corridor for pedestrians and bicyclists. A preferred alternative has been selected. This alternative includes:

- Reconstructing CH 8 – roadway remains a two-lane facility
- Constructing a roundabout at the intersection of CH 8 and CH 91
- Constructing a multiuse trail
- Removing the access at Lucerne Trail and constructing a frontage road that connects to France Boulevard
- Adding turn lanes and reconstructing the intersections at Monterey Avenue, Wagon Wheel Trail and France Boulevard
- Reducing and modifying driveway accesses along the corridor

Tonight's Focus

The focus for this evening's meeting is to provide property owners and residents with information on the following:

- **Property acquisition** – answer questions about impacts and the acquisition process
- **Staging plan** – provide information on the timing of construction activities and the order in which the project will be constructed
- **Schedule** – provide information on when key activities (final plans, right of way acquisition, construction, etc.) will begin and end

County staff will be available to answer questions on the project.

County Highway 8 Reconstruction Project

Project Schedule

Task Description	2013			2014			2015												2016											
	OCT 2014	NOV	DEC	JAN	FEB	MAR	APR	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC	JAN	FEB	MAR	APR	MAY	JUNE	JULY	AUG	SEPT	OCT	NOV	DEC			
Concept Development/Preliminary Design	█																													
Final Design	█	█	█
