**Subject:** Re: Database Review Request

**THIS EMAIL IS NOT A PROJECT CLEARANCE.**

This message simply reports the results of the cultural resources database search you requested. The database search produced results for only previously known archaeological sites and historic properties. Please read the note below carefully.

Archaeological sites and historic properties were identified in a search of the Minnesota Archaeological Inventory and Historic Structures Inventory for the search area requested. **Reports containing the results of the searches are attached.**

The result of this database search provides a listing of recorded archaeological sites and historic architectural properties that are included in the current SHPO databases. Because the majority of archaeological sites in the state and many historic architectural properties have not been recorded, important sites or structures may exist within the search area and may be affected by development or construction projects within that area. Additional research, including field survey, may be necessary to adequately assess the area's potential to contain historic properties.

Properties that are listed in the National Register of Historic Places (NRHP) or have been determined eligible for listing in the NRHP are indicated on the reports you have received. The following codes on the reports you received are:

NR – National Register listed. The properties may be individually listed or may be within the boundaries of a National Register District.

CEF – Certified Eligible to the National Register findings are usually made during the federal review process, these properties have been evaluated as being eligible for listing in the National Register.

## Attachment V-2

**SEF** – Staff eligible findings to the National Register are properties that have been determined eligible by SHPO staff.

**DOE** – Determination of Eligibility is made by the National Park Service and typically refers to properties deemed eligible but the owner objects to the listing.

**CNEF** – Certified Not Eligible to the National Register. SHPO has begun to record properties that have been evaluated as not eligible for listing in the National Register. If the box on the form has a check the property has been determined to be not eligible.

Properties without **NR, CEF, SEF, DOE, or CNEF** designations in the reports you received may not have been evaluated and therefore no assumption to their eligibility can be made.

If you require a comprehensive assessment of a project's potential to impact archaeological sites or historic architectural properties, you may need to hire a qualified archaeologist and/or historian. If you need assistance with a project review, please contact Kelly Gragg-Johnson in Review and Compliance @ 651-259-3455 or by email at [kelly.graggjohnson@mnhs.org](mailto:kelly.graggjohnson@mnhs.org).

The Minnesota SHPO Survey Manuals and Database Metadata can be found at <http://www.mnhs.org/shpo/survey/inventories.htm>

SHPO research hours are 8:30 AM – 4:00 PM Tuesday-Friday.

# The Office is closed on Mondays.

Mr. Cinadr,

We are preparing an EAW for a project located about 1 mile west of Belle Plaine, MN just off of Highway 169 and Quarry Trail and would like to request an archaeological/historical/cultural review of the site. The proposed use is a stabilization project for Quarry Creek. The site is located in the S ½ of Section 3 and Section 10 of Blakely Township TWP113N Range 25W in Scott County, Minnesota.

A topographic map excerpt with the site delineated is included.

If you have any questions please feel free to contact me.

Thank you,
